

ELECTRIC FUEL PUMPS

Ideal for portable diesel transfer applications including bulk tank, service truck or utility vehicle applications these 12/24V ELECTRIC DIESEL PUMP KITS are an economical alternative to manual pumps.

These electric diesel pumps are self-priming vane pump with a built-in by-pass valve delivering a superior cool running pump that has a 30 minute duty cycle. The pump delivers flow rates up to 40LPM (free flow).

These pumps are supplied complete, everything needed for the operator to start transferring diesel.

For the best control and accuracy, it is recommended to use the appropriate Macnaught digital diesel meter (see page 8) and filter (see page 17).
